18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education? 8. Compared with five years ago, has your quality of life in Vermont improved, stayed about the same, or worsened?

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education? 18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?	10. Democrats and Progressives have mostly controlled both chambers of the Vermont Legislature since 2005, sometimes with supermajority control. Overall, have the policies enacted during this period worked in your favor, or against your interests?

11. Do you agree or disagree with the following statement: "Rural landowners' property rights are being infringed by political special interests pursuing an ideological 'green' agenda."

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?

13. Would you vote for or against Prop 3 if it means higher property taxes due to higher local school budgets and other higher taxes due to higher government wages?

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?

15. The head of the Vermont Teachers Union said ... Do you agree with the Vermont Teachers Union head that Vermont taxpayers are not spending too much on public education?

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?	Yes	No	Not Sure	Total

16. Vermont's Child Care Contribution, which took effect in July 2024, includes ... Knowing this, do you think it's fair that the state employee union got this special loophole in the tax code?

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?	Yes	No	Not Sure	Total

17. In "right-to-work states," state law says that employees cannot be required to join a union or pay union dues ... Knowing this, would you support Vermont becoming a right to work state?

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?

18. Vermont spends over $30,000 per public school pupil, the second-highest amount in the country and roughly twice the national average. This level of spending contributes to higher property taxes and leaves fewer resources available for other critical government services. At the same time, student test scores are declining faster than in any other state. Knowing this, what is your opinion on how much Vermont spends on public education?
